Water capacity / consumtion	50 l / 1,2 l per. min
Min. oil flow	35 litres continuously
Min. hydraulic pressure	180 bar
Hydraulic connection	1 x return
	2 x double-acting
Drainage oil	1 x unpressurised return
Electricity	1 pc. 12V with on/off switch

4-star suction unit

The PM 10/2.5 diploma is your guarantee for an environmentally friendly sweeping system. The top rating means that a minimum of dust particles are emitted when the Tornado 400 sweeps the streets clean.

Great suction power

We have reduced the distance between the suction nozzle and the container to less than 1 metre. This gives the machine an exceptionally high suction power. You get a pick up rate of up to 93,4%*.
