

Timan Combi Spreader CS-200

With this uniquely designed Combi Spreader you control everything from the cabin. We have combined the disc spreader and the drop spreader and created a tool that gives you complete control during your winter service. From the cabin you adjust the spread rate and the spread width.

Never has winter maintenance been this convenient.

Technical Data

Length	730 mm
Width	1075 mm
Height	1380 mm
Weight	185 kg

Capacity	300 l
Spreading width	1-6 m
Three-point linkage	Cat.1

Min. oil flow	20 l/min
Max. effect	6,5 kW
Max. hydraulic pressure	200 Bar

Full control over the spread rate

No more leaving the machine to change the spread rate. Regulate the amount of spread from 1 metre to 6 metres. This makes your winter service much easier when switching between pavements, streets and parking lots. This protects the environment and reduces costs.

Convenient attachment-tool change

Just stay in the cabin and let the automatic tool change do the work. In five seconds you can change the attachment from a disc spreader to a drop spreader. Simply press the button on the control panel and the discs automatically raise and stop.
