

## Timan RC-751

Efficiency, safety and work satisfaction – just remotely controlled.

- Better working conditions
- Compact slope mower
- Easy to transport
- Safe and user-friendly
- Easy and safe to operate
- Danish design and quality

If someone wants to do their job well, they need the right working conditions. That is why, for more than 16 years, the design and development of our machines have focused primarily on the comfort of the driver at work.

Every Timan machine has Danish quality and craftsmanship – from design through production to service. All this is a guarantee of greater efficiency and operational safety, so you can do your job well regardless of the activity or season.

We believe that the interaction between job satisfaction and efficiency paves the way to the best result. That is why we say:

Timan *Comfortably Better*

# TIMAN RC-751

Welcome to a better working experience. Designed from the start to be a safer, more efficient and user-friendly alternative to handheld brush cutters. The RC-751 is your strong partner for working in demanding terrain and your guarantee of a safe working environment.

The Timan RC-751 has been developed in close collaboration with professional users. It ensures you the best working conditions and enables you to deliver the best result. Every time.

**Work everywhere**  
Climb steep slopes and manoeuvre between obstacles. With a height of only 60 cm, the Timan RC-751 is the most compact remote-controlled flail mower in its class.

**Cut in front of the belts**  
The out-front cut means that grass is cut before the tracks, and the full width cutting unit allows a close cut to walls and edges. Because everything should be done in one workflow.

**Experience constant stability**  
The RC-751 will always be in full contact with the surface. As the belts can move independently of each other, the machine will always be able to provide maximum traction when steep slopes have to be climbed.

**Maximize your work capacity**  
Equipped with 16 sets of Y-flails, the RC-751 easily lays down shrubs, hogweeds or small wild shoots on slopes with an inclination of up to 50°. In one hour, you will be able to cover up to 4.500m<sup>2</sup>.

# GREATER WORKING JOY STARTS WITH BETTER CONDITIONS.

Good work needs good working conditions. That is why we have designed the Timan RC-751 with the user in mind - this means fewer work injuries and higher efficiency. This machine now works for you.

## Fewer injuries - less sick leave

We have removed the user from the handheld brush cutter. This way you avoid injuries and uncomfortable working positions. It reduces sick leave and work risks.

## Easy to operate

With its intuitive design, the professionally approved remote control gives full control of the machine.

## Reliable and dependable

Danish quality is your guarantee for long operating periods between service inspections. With easy access to engine compartments and flails, daily maintenance is very easy.

## Portable and stable

The light weight and compact size make it easy to transport the RC-751 on a trailer or in a van.

# WE CARE ABOUT YOUR SAFETY

We have designed the RC-751 to be your reliable partner when working in areas with difficult accessibility where safety must be paramount. It gives you a sense of security, and enables you to deliver the best result.

Timan RC-751 is your guarantee for a safe working environment all year round.

**Safety on unsafe terrain**  
The flail mower switches off automatically if you drive the RC-751 on slopes with an inclination above 50°. Since the engine doesn't stop, you can easily drive the machine to a flatter area.

**Remote security**  
If you have an unexpected need to stop the machine during work, the remote control is equipped with an emergency stop. Because safety comes first.

**Emergency stop if you trip**  
Should you be unlucky to fall during work, the engine on the RC-751 will automatically stop. It gives you absolutely minimal risk of work accidents.

**Overview during operation**  
The Timan RC-751 is designed to work in areas with difficult accessibility. You can therefore stay in a safe distance of up to 120 metres and let the machine do the hard work.

**Technical data Timan RC-751**

Engine – Briggs & Stratton ..... 14 HP  
Transmission to tracks ..... Hydraulic  
Transmission to flail mower ..... Mechanical  
Standard Y-flails ..... 16 sets = 32 pcs.

Total length ..... 1.877 mm  
Total width..... 865 mm  
Total height ..... 600 mm  
Mowing width..... 750 mm  
Mowing height..... 30 til 80 mm  
Weight ..... 345 kg

Max inclination in all angles .....50°  
Turning radius ..... 0 mm  
Max operating distance ..... 120 m  
Max working speed ..... 6 km/h  
Fuel consumption ..... Maks. 3 l/h  
Theoretical max output ..... 4.500 m2/h

**Option**

Spikes · Blitzlys · L-flails · Charger

**Call us for a non-binding demonstration**
