

## RC-1000s

A new generation of remote controlled tool carriers.

- Better work environment
- Easy access to engine room
- Quick and easy tool change
- Reliable every season
- Easy to transport
- Dansk design and quality

# RC-1000s

Meet the RC-1000s: The fully hydraulic and versatile tool carrier for all seasons.

This 2. generation model is built to deliver. Easy access to the engine compartment simplifies maintenance, while the Zero-turn design allows you to navigate easily, even in tight spaces. The machine can tackle slopes up to 50 degrees and is perfect for clearing difficult material.

Whatever the task, you can quickly switch between a wide range of attachments ensuring optimal operation in any season.

## Hammer flails for bush and scrub clearing

The heavy-duty hammer flails efficiently clear bushes and scrubs. The downward direction of rotation increases the capacity in difficult material and ensures excellent results.

## Built for tough working conditions

With the RC-1000s you can safely work on slopes up to 50° and under solar panels. Its robust design and versatility ensure optimal performance, even in the most challenging terrains.

## Advanced stability system

The RC-1000s is designed to deliver maximum traction, even on steep slopes. The independent tracks ensure that the machine is always in full contact with the terrain, improving stability and performance.

## Effortless transport

The compact and lightweight RC-1000s is easy to transport on both trailers and vans, so you can take it with you anywhere, saving time and resources.

# GREATER JOB SATISFACTION STARTS WITH BETTER WORK CONDITIONS.

## Minimise sick leave

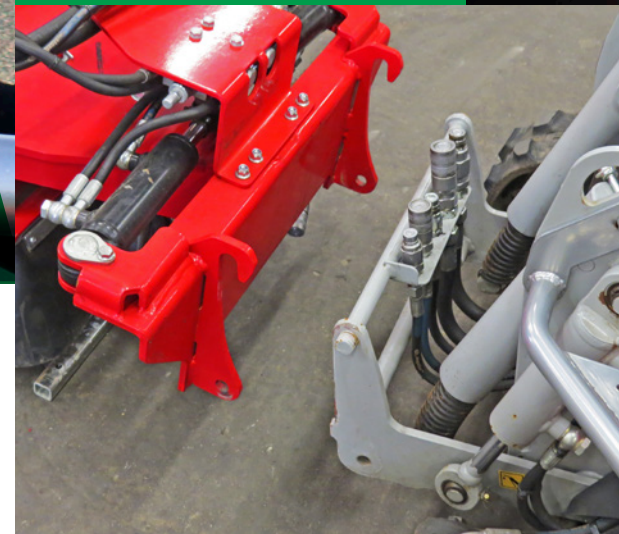

Removing the operator from the machine avoids injuries and uncomfortable postures, which not only protects employee health but also ensures a more efficient work process. RC-1000s is a solution that prioritises the health and safety of your employees.

## Ergonomic and uninterrupted operation

The RC-1000s comes with two rechargeable batteries that can be charged directly on the machine during use, ensuring uninterrupted operation. The ergonomic remote control gives you control of the machine from up to 150 metres away.

## Quick and easy tool change

Effortless tool changing makes the RC-1000s an indispensable part of your equipment. You can easily change tools on the RC-1000s in minutes and without the use of tools. This flexible design maximises your productivity and ensures you can quickly adapt the machine to the demands of the job.

## Easy access to engine compartment

Access to the engine compartment of the RC-1000s is both quick and easy, requiring no tools. The machine is designed with removable cantilevers and sides, making it even simpler to perform necessary maintenance and cleaning. This ensures minimal downtime and maximizes machine uptime and efficiency.

# A future-proof solution: WHATEVER THE TASK, TERRAIN AND TIME OF YEAR.

## Flail mower

The ideal tool for demanding terrain. With 18 sets of Y flails and a cutting width of 1 metre, it effectively handles small bushes and shrubs. The direction of rotation can be changed to handle coarser brush and shrubs.

## Rotary mower

The rotor mower's three gate knives offer a 1,350 mm cutting width, and the heart-shaped shield allows close cutting near signs and posts. The mower's fine cut grass composts naturally, fertilizing the soil.

## Stump grinder

Control the stump grinder from a safe distance even in difficult conditions. The stump grinder grinds down to 18 cm underground and handles stumps with a diameter of 62 cm and a height of 23 cm.

## Weed brush

The weed brush effectively removes weeds from roadsides, paths and other hard-to-reach areas without the need for pesticides or harmful chemicals. This makes it an eco-friendly choice for outdoor maintenance.

## Double acting cutter bar

The best tool for gentle mowing in hilly terrain. The 170 cm wide Double Blade system provides a capacity of over 10,000 m<sup>2</sup>/h.

## Counterweight

When mounting other attachments on the machine, such as a snow blower, it is recommended to use a counterweight for optimal balance.

## Centerdriven Sweeper

The 500 mm diameter hydraulic broom with a sweeping width of 1200 mm is suitable for clearing all year round.

## V-Blade

With 3 hydraulic blade settings, you can efficiently clear even tight areas and slopes while standing at a safe distance.

## Snow thrower

Throws snow up to 20 metres and is ideal for areas where there is no room to push the snow to the side. It has a working width of 120 cm.

“ This machine has really proved to be a good investment, saving us time and effort - especially on steep slopes and challenging terrain.

**Technical Specifications Timan RC-1000s**

Engine Vanguard . . . . . 23 HP  
Working hydraulic . . . . . Gear pump 35 liters 250 bar  
Transmission to belts . . . . . Hydraulic  
Transmission to flail head . . . . . Hydraulic  
Standard Y-flails . . . . . 36 pcs.  
Max work inclination . . . . . 50°  
Max work speed . . . . . 7km/h /4.35 mph  
Mowing width with flail mower . . . . . 1000 mm/39.37 inches  
Theoretical max. output with flail mower . . . . . 7000 m2/75,347 ft²

Weight base machine. . . . . 440 kg/970 lbs  
Length base machine. . . . . 1310 mm/51.57 inches  
Width base machine. . . . . 1000 mm/39.37 inches  
Height base machine. . . . . 685 mm  
Weight with flail mower . . . . . 580 kg/1279 lbs  
Length with flail mower . . . . . 1970 mm/77.56 inches  
Width with flail mower . . . . . 1112 mm/43.78 inches  
Height with flail mower . . . . . 685 mm/26.97 inches

**Optional equipment available**

LED flashlight 2 pcs.  
Working light 2 pcs.  
Hammer flails 18 pcs.  
Storage frame for flail mower  
Fitting plate for equipment

Turning radius  
0 mm/0 inches

Fuel 14 l/3.7 gal  
Consumption per  
hour app.  
ca. 4,0 l/1.06 gal

Automatic  
reversing fan for  
hydraulic cooler

# We build with the driver in mind.

Efficient work requires the right environment. At Timan, we've been designing machines that focus on operator comfort and job satisfaction since 2004.

Behind every machine is solid Danish craftsmanship and quality - from design and production to service. This ensures high efficiency and reliability, so you can always deliver the best work, whatever the task and season.

We believe that well-being and productivity create the best results.
